

KRAKEN

Health pilot

Our health and wellness data exchange marketplace aims to enable the **secure and real-time flow of information**, such as laboratory results and medical histories, between individuals and organizations, ensuring GDPR compliance.

Data providers

Full control over the sharing and monetisation of the data they produce or own rights to.

Individuals
App makers
Wearable makers

Hospitals
Clinical units

Research centres
Well-being service providers

Health-tech, Pharma
Insurance
and other companies

Education pilot

Data from academic students (e.g. graduation certificates, course grades, enrollment status) is **protected with privacy-preserving cryptography**, authenticated using self-sovereign identity solutions, and shared in a marketplace.

Students

Sharing selected academic data for job applications.

Universities

exchanging students' data while ensuring their privacy.

Recruiters

Identifying the top job candidates by analysing student datasets.

Companies

Finding new talent more easily through greater access to student data
